

KILSBY COMMUNITY EMERGENCY & FLOOD RESILIENCE PLAN

Community

Kilsby

Written By: Julie Bunyan

Date: 25th February 2019

Date of last amendment: N/A

Aims & Objectives

Aim- To increase the resilience of the community to an emergency by the identification of community procedures

Objectives

- Identify the risks to the community and relevant response actions
- Identify resources in the community available to assist in an emergency
- Identify vulnerable people in the community
- Provide key contact details

(A) Community Resilience & Response Group (CRRG)

Name	Position of CRRG	Address	24 hr Contact Number(s)
Julie Bunyan	Flood Warden	12 Daventry Road Kilsby CV23 8XF	07940 525272 01788 823707
Tom Hindle	Flood Warden	Jaffi House Kilsby CV23 8XX	01788 823378

KILSBY COMMUNITY EMERGENCY & FLOOD RESILIENCE PLAN

(D) Local Risks – what has happened?

Local Risk	Incident Details	Action Taken
2012 Flooding in Daventry Road	Surface water flooding due to drains compromised during heavy and prolonged rainfall. Several houses experienced water ingress due to drain failure and water overflowing from the road.	DDC contacted via Councillor Lomax. Water pumped out from front garden areas and drains.
2014 Flooding in Daventry Road	Surface water flooding due to drains being compromised during heavy and prolonged rainfall. Several houses experienced water ingress due to drain failure and water overflowing from the road.	DDC contacted. Water pumped out to prevent further flooding. Dec Road drained cleaned and cleared. All drains were blocked at the bottom of Daventry Road. Secondary drain system in front of dwelling blow to clear debris
2015 Flooding Daventry Road	Surface water flooding due to drains compromised during heavy and prolonged rainfall. Several houses experienced water ingress due to drain failure and water overflowing from the road.	Flooding less severe. Residents prevented own flooding

What could happened?

Local Risk	Likelihood to Occur	Potential Impacts
Daventry Road could experience further flooding if preventative maintenance not undertaken to drain system on a regular basis.	Medium - High	Flooding to dwellings. As the A361 is a main road this creates a danger to traffic and pedestrians. Further flooding downstream in the village
Bottom of Rugby Road Continuing flood issues yet to be resolved. This area is one the main discharge points for surface water in the village.	Medium - High	Create flooding issues in the village as the water is unable to discharge at a reasonable rate causing a back flow of water. Busy access road to the village, therefore flooding issues create a danger for traffic and pedestrians
A361 Daventry Road Housing Development Attenuation Pond	Med - High	Possibly overflow issues if not maintained to a high standard.

KILSBY COMMUNITY EMERGENCY & FLOOD RESILIENCE PLAN

Barby Road	Low - Med	Discharge point for surface water. Can be exposed to minor flooding in fields and road if ditches not maintained
General Ditch Maintenance around village	Medium	Ongoing ditch clearance required to maintain resilience
Daventry International Rail Freight Terminal (DIRFT) is close to Kilsby. Incidents at their many warehouses could potentially impact on Kilsby	Low - Med	Closure of roads at DIRFT could increase traffic flow, speeding and congestion through Kilsby
DIRFT HGVs use the A5 and A361 which border/run through the village		Any accident involving an HGV could impact on Kilsby in terms of road access or the need for emergency help for any casualties.

N) Useful Information to help everyone in the community

Winter Weather

Nearly all communities, regardless of where they live, are likely to face some type of severe winter weather at some point during the year. Winter storms can range from a moderate snow over a few hours to a blizzard that lasts for several days. Many winter storms are accompanied by dangerously low temperatures and sometimes by strong winds, ice, sleet and rain.

One of the biggest concerns is the winter weather's ability to knock out heat, power and communications services, sometimes for days at a time. Heavy snowfall and extreme cold can immobilize a wide area.

In a winter weather scenario you should:

- Check on older neighbours or relatives to make sure they're safe and well. Make sure they're warm enough, especially at night, and have stocks of food and medicines so they don't need to go out during very cold weather. If you are worried about a relative or neighbour, contact Wrapped Up Northants on 0845 677 2220.
- Keep up to date with road and weather conditions and severe weather alerts.
- Make sure that your community is ready for cold weather by informing them of how to stay safe this winter. www.nhs.uk has useful information on how to KEEP WARM AND KEEP WELL during cold spells.
- Clear your car of any ice or snow, make sure your car is winter ready and you have a car emergency kit.
- Wear suitable clothes and footwear.
- Encourage people to get the flu jab.

The Snow Code

- There is no law stopping you from clearing snow and ice from paths pavements or public spaces outside your home, shop or office.
- Don't be put off clearing snow & ice because you're afraid someone will get injured. Regardless of what you do, pedestrians & drivers have a responsibility to be careful themselves.
- Doing your part may help the local community and will be very helpful to the more vulnerable members of society.
- Go to the following NCC website for more: www.northamptonshire.gov.uk/emergencies

Heatwave

Most of us welcome hot weather, but when it's very hot there are health risks. The very young, and the elderly are particularly at risk. Very hot weather can make heart and breathing problems worse.

The Meteorological Office has a warning system that issues alerts if a heatwave is likely. The following advice applies to everybody when it comes to keeping cool and comfortable and reducing health risks:

- Take notice of alerts on the radio, TV and www.metoffice.gov.uk about keeping cool.

KILSBY COMMUNITY EMERGENCY & FLOOD RESILIENCE PLAN

- Visit or phone people who are less able to look after themselves, such as older neighbours, relatives and friends, and people with health conditions or mobility problems.
- Shut windows and pull down the shades when it is hotter outside. If it's safe, open them for ventilation when it is cooler.
- Avoid the heat: stay out of the sun and don't go out between 11am and 3pm (the hottest part of the day).
- Keep rooms cool by using shades or reflective material outside the windows. If this isn't possible, use light-coloured curtains and keep them closed (metallic blinds and dark curtains can make the room hotter).
- Have cool baths or showers, and splash yourself with cool water.
- Drink cold drinks regularly, such as water and fruit juice. Avoid tea, coffee and alcohol. If you go outside wear sunglasses, a hat and suitable light loose fitting clothing and apply sun cream.

IF YOU SUSPECT THAT SOMEONE HAS HEATSTROKE, CALL 999 IMMEDIATELY. HEATSTROKE CAN CAUSE IRREVERSIBLE DAMAGE TO YOUR BODY, INCLUDING THE BRAIN, OR DEATH.

Power Outage

When the weather is nice it's easy not to give a second thought to preparing for storms. But thinking ahead can give you peace of mind when weather turns threatening.

To get the latest information on power cuts local to you, and who to contact for further information go to www.westernpower.co.uk/Power-outages/What-s- Happening.aspx

- Keep a torch handy. Avoid using candles and paraffin heaters.
- Keep a wind-up/battery/solar radio ready so you can listen to local radio updates.
- Many modern telephones, especially digital or cordless ones don't work in a power cut. Keep an ordinary analogue one handy.
- Protect sensitive electrical equipment such as computers with a surge protector plug.
- If you have a mains operated stair lift, check to see if there is a manual release handle that can be used to return the stair lift safely to ground level if it stops working.

Western Power Distribution have a Priority Services Register, so they are aware of residents needs and can advise them accordingly. If anyone in your community is vulnerable register at www.westernpower.co.uk/About-us/Priority-Services/Priority- Services-Register.aspx

Don't assume that the power company know you have no power. Please ring them as soon as possible. If they already know about the problem, they should be able to tell you when they expect your electricity to be restored. Please call 105.
